Moisture Adsorbing Activ-Film™ materials

Characteristics
Please note that these values are average measurements. Tolerance (will vary based on product)

Film
Width range 75 mm - 150 mm
Thickness range 0.3 mm - 1.2 mm
Color* Natural or white
*Custom colors may be available and typically require a set up charge

Activ-Polymer™ Technology
Desiccant type silica gel
Shelf-life** Typically 1 year or more, varies by product, storage in use, and customer application (22°C/80%RH)

**Time the CSP product can be stored prior to being packaged with the product to be protected

Typical Capacity
3.1 – 12.4 mg/cm²

Applications
Industries served
• Pharmaceutical/OTC
• Industrial
• Food/Nutrition
• Diagnostics
• Electronics

Benefits
Design
• Standard rolls or reel format
• Can be heat staked or adhered using adhesive
• Can be die cut into unique shapes

Activ-Polymer™ Technology
• 100% utilization of the desiccant material capabilities
• High adsorption capacity
• Maintains a low relative humidity
• Residual moisture in dosage can be removed
• Extends product’s shelf-life

Regulatory and Quality
• ISO-9001 certified company
• Listed in the DMF
• GMP manufacturing upon request
• Complies with Regulation (EU) No 10/2011
