Activ-Film™ materials

Moisture Adsorbing

Applications

Industries served
• Pharmaceutical/OTC
• Industrial
• Food/Nutrition
• Diagnostics
• Electronics

Benefits

Design
• Standard rolls or reel format
• Can be heat staked or adhered using adhesive
• Can be die cut into unique shapes

Activ-Polymer™ Technology
• 100% utilization of the desiccant material capabilities
• High adsorption capacity
• Maintains a low relative humidity
• Residual moisture in dosage can be removed
• Extends product’s shelf-life

Activ-Polymer™ Technology
• Desiccant type: molecular sieve
• Shelf-life**: Typically 1 year or more, varies by product, storage in use, and customer application (22°C/80%RH)

**Time the CSP product can be stored prior to being packaged with the product to be protected

Typical Capacity

4.2 – 19.9 mg/cm²

Characteristics

Please note that these values are average measurements. Tolerance (will vary based on product)

Film
Width range 75 mm – 150 mm
Thickness range 0.3 mm – 1.2 mm
Color* Natural or white

*Custom colors may be available and typically require a set up charge

Regulatory and Quality

• ISO-9001 certified company
• Listed in the DMF
• GMP manufacturing upon request
• Complies with Regulation (EU) No 10/2011
